Work Experience

General Electric Corporate | Atlanta, GA (Remote)   May 2022 - Present
Full Stack Software Engineer
- Spearheaded the migration of the cloud service order management system from Angular to React and Typescript, significantly enhancing system efficiency and user experience.
- Developed and maintained a robust React component library, streamlining future development efforts and reducing bug fix turnaround time.
- Implemented use case tests and conducted debugging sessions to ensure product stability and reliability.
- Optimized the back end by fixing bugs and writing new code to assist with front end work.

Inncretech | Princeton, NJ   August 2020 - May 2022
Programmer, Front End
- Collaborated on diverse projects, delivering responsive, ADA compliant, and SEO optimized websites to clients across various industries.
- Partnered with executives to architect and deliver scalable products, serving thousands of users with seamless user interfaces.
- Mentored junior developers, designing comprehensive training programs to instill proficiency in React and Typescript.
- Actively contributed to the hiring process by screening resumes, conducting interviews, and assessing technical skills of potential candidates.

Vorsi | Hudson Valley, NY   May 2019 - August 2019
Intern, Front End Developer
- Assisted in the development of the CRM web application, gaining hands-on experience and insights under mentorship.
- Implemented a key feature allowing users to download auto-generated PDFs with customizable customer data and analytics.
